

**Niagara™ Series**
***Flexibility and Capacity to Conquer any Application***

- Advanced PSA technology with purity up to 99.9995% (5 ppm O<sub>2</sub> content)
- Flexible capacities to meet any requirement
- Full color, animated graphical user interface (HMI)
- Remote user monitoring via any browser interface (mobile, tablet, PC)
- Remote troubleshooting by factory personnel
- Automatic trend graphing of performance (real-time and historical)

**NitroBreeze™ Series**
***Modular, Portable, "One-Touch" Operation***

- Advanced PSA technology with purity up to 99.999% (10 ppm O<sub>2</sub> content)
- Low to Moderate capacities, modular design
- Installation is a breeze! Fits through standard 36" man doors
- Purpose driven design -- fully plug and play
- Easy "One-Touch" operation
- Password protected screens for advanced maintenance requirements.

**Amazon™ Series**
***Steady, Capable, Modular Design for Any Requirement***

- Continuous flow membrane technology
- Steady Flow / Steady State process
- N<sub>2</sub> Purities up to 99.5% (0.5% O<sub>2</sub> content)
- Flexible capacities to meet any requirement
- Easy connectivity to plant control systems (DCS)
- Limited mechanical components for reduced complexity

**Spirit™ Series**
***The Benchmark for Flexibility, Tailored for Your Application***

- Continuous flow membrane technology
- Extremely small footprint for ease of integration
- Design flexibility to meet extremely varied application demands
- Low to moderate capacities
- N<sub>2</sub> purities up to 99.5% (0.5% O<sub>2</sub> content)
- No electronics -- just pipe inlet and outlet to your process (an easy solution to hazardous area requirements)
